

Product No. RN142

BLt™

Physician-formulated Antimicrobial Support

Features & Benefits

BLt™ was formulated by a physician & herbalist as a stand-alone or adjunctive support for vector-related issues. Combining science & technical botanical learnings with a powerful phospholipid delivery system, BLt™ provides the practitioner balanced support with optimal absorption and patient response. May be combined with many pharmacological & nutraceutical preparations.

- **Balanced Organ Support** – developed to promote healing and multi-organ support
- **Peak Absorption** – phospholipid delivery complex for maximum nutrient absorption
- **Superior Herbal Extraction Process** – organic cane alcohol is the preferred extraction process for alkaloid containing roots & barks

Supplement Facts

Serving Size: 40 drops
Servings Per Container: 60

Amount Per Serving	%Daily Value**
--------------------	----------------

Proprietary Herbal Blend:	205 mg	†
<i>Ceanothus americanus</i> (Red Root), <i>Smilax medica</i> (Sarsaparilla), <i>Lomatium dissectum</i> , <i>Eupatorium perfoliatum</i> (Boneset), <i>Dipsacus fullonum</i> (Teasel), <i>Stillingia sylvatica</i> , <i>Juglans nigra</i> (Black Walnut Hulls)		

** Percent Daily Values are based on a 2,000 calorie diet.
† Daily Value not established.

OTHER INGREDIENTS: Distilled Water, Organic Cane Alcohol (20%), non-GMO Sunflower Phospholipids.

Each Serving Promotes the Body's Healthy:

Constituent	Anti-Viral/ System	Anti-Bacterial Response	Anti-Microbial/ Parasitic Response	Immune Modulation & Support	Coagulation and/or Circulation	Lymphatic/ Detox/ Organ Systems	Die-off (Herxheimer)/ Pain Response	Digestion	Inflammatory Response/ Antioxidant System
Red Root		x		x		x			x

Boneset	x		x	x	x	x	x		
Black Walnut Hulls	x	x	x			x		x	
Lomatium dissectum	x			x	x				x
Sarsaparilla				x		x	x		x
Stillingia						x			

For Best Results

As with any new nutritional supplement, patients should start slowly. Take away from meals and add to 1-3 ounces of water. If patient experiences nausea, have the patient dose the product 15-30 minutes after a light carbohydrate snack.

What to Expect

Patient reaction to these advanced microbial balancers is similar to what one experiences when starting immune support protocols: some patients experience a "Herxheimer" reaction while others do not. However, a patient who reacts to antibiotics and/or other nutritional protocols should start slowly.

Suggested Detox Protocol

As with other immune support protocols, doctors open detoxification pathways and provide binders to move toxins out of the body. Many doctors incorporate **Tri-Fortify™ Orange** (1 teaspoon per day) and **PectaSol®** (three capsules per day) for at least three days prior to commencing and during microbial treatment.

Cautions

Lomatium Rash is a rare but bothersome proliferation of raised red spots, not itchy or painful, that usually appears on the torso, and lasts sometimes as long as three weeks after discontinuing use of the herb. It is not immune mediated therefore does not respond to antihistamine or immune suppression such as prednisone. The rash usually only occurs once and does not reappear when lomatium is restarted. When patients slowly work up dose the rash is minimized. BLt™ is formulated to reduce the potential of the rash. *Lomatium dissectum* contains coumarin derivatives, which may increase the risk of bleeding when taken with drugs that increase the risk of bleeding. Pregnant women should check with healthcare professionals before using.

Targeted Microbial Support

STARTING DOSE FOR ADULTS:

Days 1-3

3-5 drops in 1-3 ounces of water in the morning and again in the evening

Days 4 & beyond

Increase 3-5 drops every other day, in both morning and evening doses

FULL DOSE FOR ADULTS:

This would take 10-14 days to get to full dose of 40 drops in each the morning and the evening.

Another dosing strategy used by many doctors is to have patients work up to a double dose (80 - 90 drops twice per day).

SENSITIVE PATIENTS:

Start with Detox Protocol to the left plus repeat 30 minutes before taking BLt™ and/or Crypto-Plus™

Start with 1 drop in 1-3 ounces of water once per day, and slowly increase dose as your body is able to do so.

2 hours after taking BLt™ and/or Crypto-Plus™, repeat Detox Protocol

ULTRA-SENSITIVE PATIENTS:

Start by dosing every other day; consider having patient swish in mouth and spit out to minimize absorption

PEDIATRIC DOSING:

Based on reported physician experience, pediatric dosing with children 8 years and older: start at 1-2 drops added to diluted apple or berry juice and work slowly up to 20-30 drops 2x/day over 2-3 weeks.
